You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type:

Société d'Investissement à Capital Variable [SICAV]

This product is not subject to any fixed term.

This product is not subject to any fixed term.

Objectives:

ESG socially responsible active investment strategy seeking to generate a high level of current income with lower volatility by diversified investments in US dollar-denominated high yield corporate bonds expected to mature, be called or otherwise be redeemed within three years.

The Fund may invest in securities regardless of their rating and in securities which are not rated. The Fund will invest primarily in securities rated below investment grade.

The Fund may also, from time to time, invest in securities of foreign companies and, possibly, in obligations of governments or governmental agencies or instrumentalities.

A Shareholder may redeem its shares in the Fund on demand, on each day on which banks in Luxembourg and New York are open all day for business. The fund is actively managed and invests predominantly in corporate bonds rated below investment grade.

The Fund may also, from time to time, invest in securities of foreign companies and, possibly, in obligations of governments or governmental agencies or instrumentalities. The Fund may also make temporary short-term investments in cash or in Money Market Instruments not to exceed 20% of the Net Assets to maintain liquidity for short-term defensive purposes or to comply with applicable regulations.

The Fund does not intend to declare and make distributions with respect to the net investment income and realized capital gains, if any, attributable to this class. Accordingly, the net investment income of this class will neither be declared nor distributed.

This Fund is not managed with reference to a benchmark.

This product uses forward foreign exchange contracts to hedge exposure to currencies other than the currency of the share class.

Intended Retail Investor:

This Sub-Fund is appropriate for all investors with a basic knowledge of the capital markets and with a short-term investment horizon generally of three years or less who, as a core or component of a portfolio of investments may prefer a socially responsible investment fund that seeks to invest in a diversified portfolio of U.S. corporate high yield securities denominated in U.S. dollars with an investment objective to generate current income while also experiencing lower volatility than the broader high yield market.

Depositary: J.P. Morgan SE

The Company's prospectus, latest annual and semi-annual report, and further information about the Company and its Sub-Funds is available without charge at the Company's website at: www.skyharborglobalfunds.com.

The NAV prices of this share class are published on the website www.fundsquare.net and are also available at the registered office of SKY Harbor Global Funds.

The assets and liabilities of each sub-fund of SKY Harbor Global Funds are segregated which means that each sub-fund of SKY Harbor Global Funds is a separate entity with, but not limited to, its own contributions, redemptions, capital gains, losses, charges and expenses. An investor in one sub-fund is only entitled to the assets and profits of that sub-fund.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 3 Years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the fund to pay you.

A Liquidity Event is the risk of an exceptional and broad reduction in the general ability of financial market participants to sell financial assets without an unusual and significant discount.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 3 Years			
Scenarios		1 Year	3 Years (recommended holding period)
Stress scenario	What you might get back after costs	6 080 GBP	7 090 GBP
	Average return each year	- 39.22 %	- 10.82 %
Unfavourable scenario	What you might get back after costs	8 840 GBP	9 030 GBP
	Average return each year	- 11.61%	- 3.33%
Moderate scenario	What you might get back after costs	10 240 GBP	10 680 GBP

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- GBP 10 000 is invested.

Investment: 10 000 GBP	If you exit after 1 Year	If you exit after 3 Years
Total Costs	112 GBP	363 GBP
Annual Cost Impact (*)	1.12 %	1.15 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.36% before costs and 2.22% after costs.
